MEDIA RELEASE

July 16, 2007

Coverit warranties fully backed by a London-based specialist warranty insurer

Following many months of detailed review of Coverit's systems, history and capabilities by a specialist warranty insurer based in London they have agreed to back the warranties being provided by Coverit.

This is a major endorsement for Coverit and makes it the standout amongst third-party IT warranty providers because it is the only one:

- fully compliant with Australian government requirements; AND
- backed by a specialist London warranty insurer

Coverit is the only third-party IT warranty provider that is both backed by full Australian Government compliance and totally protected by external insurance providing iron clad protection for its clients and their customers.
